EXPERIENCE

Emporia - Software Engineer | emporiaapp.com 2020 - Present

- Platform designed to make e-learning and curation more accessible through community features
- Led in developing key features such as notifications, digital wallet, comment mentions and overall front end implementation
- Assisting with onboarding of content producers/user interviews
- React-Native, React, AWS (DynamoDB, Amplify)

Bank of Tokyo-Mitsubishi UFJ - Vice President, Investment Banking 2015 - 2019

- Worked directly with clients to structure credit solutions in excess of \$10BN for Fortune 500 clients
- Managed junior associates through transaction execution process
- Collaborated with internal groups to drive efficiency initiatives
- Built returns model to determine optimal pricing and conducted sensitivity analysis
- Analyzed risk metrics for the group, including the calculation of economic and regulatory capital

PROJECTS

The Lazy Traveler

Github: github.com/wii-fitness/lazy-traveler | Website: lazy-traveler.herokuapp.com

Technology Stack: Postgres, Node.js, React-Redux, Material-UI & Google APIs

Web application that auto-generates travel itineraries based on user location, duration of stay, and preferred interests. Allows users to interactively select places – populated by the Google Places API – that they would like to include in their itinerary.

TestTakers Prep

Github: github.com/hendo10/ttprep-dashboard | Website: ttprep-dashboard.herokuapp.com

Technology Stack: Postgres, Node.js, React, Redux, Material-UI

Web application dashboard that let's students enrolled at TestTakers SAT Prep Services view progress, historical exam scores, and areas for improvement.
